*About WIDTH:

Tight Opening is the actual window measurement, usually an inside mount or other tight fitting area. If provided, we will take any necessary allowances for inside mount. For outside mount, this is the actual measurement.

Tip to Tip is the same as bracket to bracket. If you provide the tip to tip measurement, this will be the exact size of the shade from tip to tip or outside of bracket to outside of bracket.

Cloth Width will be 1" to 1⅝" less than the tip to tip width (or bracket to bracket), depending on the application. Please call for specifics.

Bracket covers for motors or clutches will add an extra ¼" to the overall dimensions. If installing an inside mount, take an additional ¼" deduction.

(A) Motor option details must be specified. Please refer to the back of this order form.

(B) Chain length cannot be less than ¾ of the height of the shade.

☐ I have ordered a MOTOR on the back of this order form.

☐ I have ordered VALANCES on the back of this order form.

☐ I have ordered OPTIONS on the back of this order form.

☐ I have given SPECIAL INSTRUCTIONS on the back of this order form.
