

## Product Installation Instructions

**Product:** Motor Tester  
**Application:** 500 series and 400 series motors  
**Revision Date:** November 30, 1995

Use the motor tester to test and adjust the shade motor. To use the motor tester:

1. Plug the plug into wall receptacle or extension cord.
2. Connect the motor tester leads to motor wires of same color (in other words, clamp red tester lead to red motor wire, green motor tester lead to green motor wire, etc.)
3. Press up arrow to raise shade, or down arrow to lower shade
4. If the full-up position or the full-down position of the shade needs adjusting, refer to instruction sheet on adjusting motor limit switches.
