# decorative hardware ~ grommet-top natural woven panels

THE LOOK OF A NATURAL WOVEN PANEL IS DRAMATIC, BEAUTIFUL AND UNIQUE. The **Grommet-Top Panel** shown in the picture below falls into soft rolling folds formed by grommets that slip over a decorative rod. The binding that is necessary to its construction is available in many colors and can be used in lots of exciting ways to add design flair and style.

The Grommet-Top Panel is especially attractive as a stationary side panel, but it can also be used as a functioning panel. A variety of grommet finishes and decorative rod styles are available for use with this panel. See photos below for choices.

Hastings Decorative Rod and Finials in Black

Our rods are 1" in diameter, but if you wish to use your own rod, you can use any rod with a diameter up to 1 3/8". However, thicker rods should be used only for stationary panels. Thinner rods make the sliding of the grommets over the rod easier.

### GROMMET COLORS

- Oiled Bronze
- Pewter
- Black

### GROMMET FINIAL & ROD COLORS

- Antique Bronze
