decorative hardware ~ ripplefold natural woven panels

NATURAL WOVEN PANELS ARE A BEAUTIFUL AND UNIQUE SOLUTION to situations in which shades won't work as well as panels. Shades over outside doors are inconvenient because they have to be raised all the way up in order to open the door. In such a situation, a Natural Woven Panel is a perfect solution. Just push it aside when you want to use the door.

The **Ripplefold Natural Woven Panel**, shown in the picture to your right can even be motorized! Ripplefold Natural Woven Panels are especially useful when you have a wider door because they can span any width you might need.

Functional, beautiful, practical, and available in a wide range of fabrics—enough variety in fabrics and binding choices to handle any design requirement.
