a world of outdoor benefits...

»get ready for summer with our **Rollstar-EX™** Shades!

- **Ideal for the outdoors**, Rollstar-EX™ shades will cool down the heat, glare and discomfort of the summer sun.
- Specifically **designed and engineered for outdoor use**, these shades work beautifully in any outdoor room or space—decks, patios, porches, pergolas and sunrooms.
- A **wide selection of fabric choices** offer color, texture, view and performance. Perfectly suited to harmonize with any exterior design or comfort need.
- Fabricated with **sleek stainless steel cables** and **cable mounts** that are tough, durable and weather resistant.
- Uniquely **designed hem bar end caps** attach and travel along the cables, thereby securing the shade when a breeze kicks up, or when a shade needs to be raised or lowered.
- Rollstar-EX™ **headboxes** are **extruded aluminum**. They protect the shade and lifting mechanisms and add a finished look.
- **Manual or Motorized controls** ensure smooth, convenient operation.
 - Motorized Rollstar-EX™ shades are great for easy push button operation or can be matched up to home automation and electronic systems as well as wind and sun sensors.
 - The manual Continuous Chain Operator (CCO) system is manufactured with stainless steel interior components and bead chain.
- Maximum width is 192”.
