*About WIDTH:

Tight Opening is the actual window measurement, usually an inside mount or other tight fitting area. If provided, we will take a 1/8" allowance for inside mount. For outside mount, this is the actual measurement.

Tip to Tip is the same as bracket to bracket. If you provide the tip to tip measurement, this will be the exact size of the shade from tip to tip or outside of bracket to outside of bracket.

Cloth Width will be 3/4" to 1 1/4" less than the tip to tip width (or bracket to bracket), depending on the application. Headboxes will require additional deductions. Please call for specifics.

****Finished Height** includes the cable mounts. The actual shade height will be 1 1/8" or 1 1/4" less to allow for the lower cable mount hardware.

*****L-Systems Only. Bracket covers** for motors or clutches will add an extra 1/4" to the overall dimensions. If installing an inside mount, take an additional 1/4" deduction.

(A) Motor selection and option details must be specified. Please refer to **page 2** of this order form.

(B) Chain length cannot be less than 3/4 of the height of the shade.

C - HEM BAR STYLES (Indicate appropriate code in above hem style box)	CODE
Covered Hem Pocket (SMALL)	CPS
Covered Hem Pocket (LARGE)	CPL
Exposed Hem Pocket (LARGE)	EPL
