***About WIDTH:**

Tight Opening is the actual window measurement, usually an inside mount or other tight fitting area. If provided, we will take a 1/8" allowance for inside mount. For outside mount, this is the actual measurement.

Tip to Tip is the same as bracket to bracket. If you provide the tip to tip measurement, this will be the exact size of the shade from tip to tip or outside of bracket to outside of bracket.

Cloth Width will be 3/4" to 1 1/4" less than the tip to tip width (or bracket to bracket), depending on the application. Please call for specifics or see pages 27 to 29 in your Coulisse Roller Shades Price List.

****BRACKET COVERS** for motors/clutches will add an extra 1/4" to the overall dimensions. For inside mount, take an additional 1/4" deduction.

(A) Chain length cannot be less than 3/4's of the height of the shade.

(B) Motor selection and option details must be specified. Please refer to **page 2** of this order form.

About HEM STYLES:

Coulisse Roller Shades have sewn hem pockets.

- I have ordered a MOTOR(S) on page 2 of this order form.
- I have ordered OPTION(S) on page 2 of this order form.
- I have ordered VALANCE(S) on page 3 of this order form.
- I have given SPECIAL INSTRUCTIONS on pages 3 of this order form.
