RAILROADED FABRICS

A railroaded fabric is a fabric that has been turned sideways, using the fabric width for the height of the shade, as illustrated below. Most fabrics can be railroaded, but not all.

Refer to the back of the sample swatch cards or the pricing charts on pages 61 to 80 to see if your fabric can be railroaded.

If a fabric is railroaded, the height of your shade will be limited to the width of the fabric less what is required to wrap around the roller tube (8" to 14" depending on tube size).

Railroaded fabric
(turned sideways using width of fabric for shade height)

SEAMED FABRICS

Some fabrics, when railroaded, can be seamed horizontally to increase the height of your shade. However, the seam may be visible.

We will always place a seam in the least noticeable location. Some fabrics cannot be seamed.

Refer to the back of the sample swatch card to see if your fabric can be seamed.

Clutch Tubes and Fabric Weight Matrix Chart (for fabric weights ≤ 8.0 oz/sq yd)

Note: The various clutch/tube combinations are **shown at the ideal shade size limit**. For example, an SL15 clutch in combination with a 1½" tube is shown in the dark brown colored area above. This combination can be used for smaller shade sizes that fall in the medium and light brown colors to the left of the chart. *However, there will be a surcharge* (see pricing on the facing page). **This clutch/tube combination should not be used for larger shade sizes.**

Note: The various clutch/tube combinations are **shown at the ideal shade size limit**. For example, an SL15 clutch in combination with a 1½" tube is shown in the dark brown colored area above. This combination can be used for smaller shade sizes that fall in the medium and light brown colors to the left of the chart. *However, there will be a surcharge (see pricing on the facing page).* **This clutch/tube combination should not be used for larger shade sizes.** Spring Assist may be desirable in situations where you have heavier, larger shades. See dotted outline area above. The Spring Assist reduces the pull force required to lift heavier shades.

CHILD SAFETY AND SAFER SHADES™

Because we care about the well-being of children, we are committed to offering window covering products that make our shades safer. For that reason, we have designed Safer Shades with features that meet or exceed the Window Covering Manufacturer Association's (WCMA/ANSI) recommendation. **When selling shades in a home with small children, alert your customer to the availability of Rollstar™ Safer Shades from Fabritec.**

SAFER SHADE FEATURES

- Roller shades have emerged as one of the safest options for window treatments, particularly in homes with children or pets. They offer a safer and more versatile alternative to traditional window coverings. The most significant safety advantage of roller shades is their cordless operation.
- We have developed a variety of Safer Shade lifting options. Below, we have detailed features of each of these lifting systems to help in deciding the best option for a specific situation.

MANUALLY OPERATED SAFER SHADES

Cordless Lifting System:

This Safer Shade does not require a pull cord to lift the shade. Shade raises gently with a slight pull on the bottom rail. Shade lowers manually by pulling on the bottom rail.

The advantage of this shade is that there is never any dangling cord to worry about. The maximum size of the shade you can lift with this system is approximately 120" wide x 120" high.

Continuous Chain Operator (CCO) Lifting System:

The Continuous Chain Operator (CCO) Lifting System is available as a Safer Shade. The advantage of this system is that there are never any dangling cords. In addition, all our CCO's come with a special, easy-to-install chain guard to prevent children from harming themselves with the chain loop.

Dangling cords are a serious danger to small, unsuspecting children, and for their safety, all cords are installed with a mandatory chain guard which comes with our shades.

MOTORIZED SAFER ROLLSTAR SHADES

Motorized Rollstar Shades:

Our motorized Rollstar shades are the ultimate in safety and convenience! With no dangling cords or chain loops, this lifting system insures that children will not get tangled up! To raise or lower a shade requires only the push of a button.

Motorized operating systems are available in a variety of configurations and price points to address a broad range of applications including Home Automation Systems.

WHO IS RESPONSIBLE FOR SAFETY?

Remind your customers that regardless of the lengths the window covering industry has gone to in making shades safer for small children to be around, the primary responsibility for protecting children from danger lies with the parent. That responsibility includes making certain that **any corded window covering product that does not meet safety standards, and even those that do, be kept out of reach of children.**

MOTORIZATION

NO NEED TO WORRY!

We will help you choose from a wide selection of motorization and control options.

BATTERY POWERED MOTORS are easy to install and easy to operate. No electrician required. Battery motors are low voltage. These motors can be controlled by Remote Controllers, Wall Switches, Smart Phones or Tablet Apps. Selected motors are home automation compatible. Battery motors have a wide range of lifting capacities. Interior applications only.

24V DC QUIET MOTORS are low voltage motors that come with a transformer and are plugged into an outlet or hardwired directly into a low voltage panel. These motors are available with a variety of control options including Remote Controls, Wall Switches, RS485 Network/Home Automation, Smart Phones or Tablet Apps. They have have a lifting capacity of 17 to 35 lbs and are capable of operating medium to very large shades. Interior applications only.

120V HARDWIRED QUIET & ULTRA QUIET MOTORS can be plugged into an outlet or hardwired directly into the home/building's electrical system. These motor systems are most widely used because of their versatility. They can be operated by a variety of control options including Remote Controls, Wall Switches, RS 232/485 Network/Home Automation, Smart Phones or Tablet Apps. These are very powerful motors that can lift any size shade. Interior and Exterior applications.

HOME AUTOMATION MOTORIZATION: Our motors (or any motor you specify) can be controlled by any Home Automation System by using an appropriate Interface. For help with Home Automation or any motorization questions, contact our experienced Technical Support Department at 800.828.2500.

All shade motors and controls are completely assembled and pre-programmed at our factory.

MOTOR PRICING

MOTORIZED LIFTING SYSTEMS

For your convenience and to be certain you have included everything required for a motorized installation in your pricing to your customer, we have bundled the price of the motor along with all of the other parts and pieces that are necessary into an all-inclusive MOTOR ASSEMBLY price for each type of motor.

Our motorized lifting systems, network accessories, remote controllers and network controls are grouped under their manufacturer names—ROLLEASE AND SOMFY.

For *additional details* on the MOTORS, refer to pages 74 and 75.

ROLLEASE MOTORS

Rollease Automate Li-ion 0.7

- Battery operated motor with built in Lithium-ion rechargeable battery.
- With remote control operation.
- Minimum shade size is 22½".
- 0.7 Nm lithium battery motor.
- Lifts up to 6 lbs.
- Speed RPM 28 (adjustable to 20 for a quieter solution).
- Sound level ≤ 35 dBA
- \$620.00 plus the cost of the Recharger and the Remote Controllers of your choice.

Rollease Automate Li-ion 1.1 with external battery

- Battery operated motor with external Lithium-ion rechargeable battery.
- With remote control operation.
- For narrow shade sizes as small as 14½".
- 1.1 Nm lithium battery motor.
- Lifts up to 9 lbs.
- Speed RPM 40 (adjustable to 30 or 20).
- Sound level ≤ 46 dBA.
- \$730.00 includes Motor Assembly with Battery Pack and batteries. Select from a choice of Remote Controllers and add the cost of the controller.

Rollease Automate Li-ion 2.0

- Battery operated motor with built in Lithium-ion rechargeable battery.
- With remote control operation.
- Minimum shade size is 28½".
- 2.0 Nm lithium battery motor.
- Lifts 13 to 17 lbs.
- Speed RPM 28 (adjustable to 24 or 20).
- Sound level ≤ 44 dBA.
- \$730.00 plus the cost of the Recharger and the Remote Controllers of your choice.

ROLLEASE MOTORS (CONTINUED)

Rollease Automate Li-ion 3.0

- Battery operated motor with built in Lithium-ion rechargeable battery.
- With remote control operation.
- Minimum shade size is 38¼".
- 3.0 Nm lithium battery motor.
- Lifts 20 to 26 lbs.
- Speed RPM 28 (adjustable to 24 or 20).
- Sound level ≤ 53 dBA.
- \$870.00 plus the cost of the Recharger and the Remote Controllers of your choice.

Rollease Automate Li-ion 10.0

- Battery operated motor with built in Lithium-ion rechargeable battery.
- With remote control operation.
- Minimum shade size is 36¼".
- 10.0 Nm lithium battery motor.
- Lifts 53 to 69 lbs.
- Speed RPM 9 (adjustable to 8 or 6).
- Sound level ≤ 42 dBA.
- \$950.00 plus the cost of the Recharger and the Remote Controllers of your choice.

ROLLEASE AUTOMATE ACCESSORIES

SOMFY REMOTE CONTROLLERS

- **Single-Channel Remote Controller (handheld):** \$150.00 each.
- **Single-Channel Remote Controller (wall mount):** \$334.00 each.
Can operate a single shade or a single group of shades.

- **Five-Channel Remote Controller (handheld):** \$186.00 each.

- **Five-Channel Remote Controller (wall mount):** \$350.00 each.
Can operate 5 individual shades, or 5 groups of shades, and can also operate all shades in a group, or all groups.

Single-Channel and Five-Channel Remote Controllers are available in white or black.

- **Sixteen-Channel Remote Controller (handheld):** \$594.00 each.
Can operate 16 individual shades, or 16 groups of shades, and can also operate all shades in a group, or all groups.

Sixteen-Channel Remote Controllers are available in white or silver.

Note: These controllers are radio signal devices, which means they do not have to be aimed at a receiver. They will work as long as they are within range of the motor assembly, i.e. within 65 feet, which covers most houses.

SOMFY NETWORK CONTROLS

- **SDN Intelligent Switch:** A programmable switch for network motors that allows you to set scenes.

– **A Six-Scene option:** \$336.00

– **A Eight-Scene option:** \$360.00

Programmable switch available in white or black.

- **RTS to SDN Interface:** \$240.00

A device that will allow one to control a network motor with a RTS remote controller or RTS wall mount switch.

SOMFY NETWORK ACCESSORIES

- **Sixteen-Channel Universal RTS Interface:** \$1,100.00 each.

The interface is used to communicate between home automation system and motor/controls. It is capable of individual or group control. Up to 16 channels are available.

Converts IR, RS232, RS485 to RTS to control Somfy RF motors.

- **RTS Repeater:** \$482.00 each.

The Repeater extends the range of all Somfy RTS controllers. Normal signal range is approximately 60 feet. RTS repeater extends range an additional 70 feet.

Simply plugs into any standard 110V AC electrical outlet. Should be placed at least halfway between sending device (remote control/wall switch/RTS interface) and the motor. Features an LED light that confirms the unit is receiving the signal. No programming needed.

SOMFY'S ADDITIONAL MOTORIZATION OPTIONS

- **TaHoma® RTS/Zigbee Interface:** \$636.00 each.
A smart home experience. Allows you to operate your motorized shades with your favorite mobile device/or tablet interface, whether you are at home or not, or integrate with third-party systems. TaHoma works with Google Assistant and Amazon Alexa, allowing for natural voice commands to control shades.
- **TaHoma® Switch:** \$420.00 each.
The TaHoma switch can control up to 60 Zigbee products and 40 channels of RTS motorized products. The app enables integration of third-party Zigbee products and complete access from anywhere.
- **TaHoma® Switch Ethernet Adaptor:** \$64.00 each.
- **TaHoma® Switch with Ethernet Adaptor:** \$472.00 each.
The Ethernet Adaptor connects the TaHoma switch directly to the network for users with under-performing WiFi.
- **Smart Plug Zigbee:** \$96.00 each.
The Smart Plug extends the Zigbee radio range for motorized window coverings.
- **Ysia 1 Channel Remote Control Zigbee:** \$136.00 each.
- **Ysia 5 Channel Remote Control Zigbee:** \$180.00 each.
Ysia offers a simple, direct control for Zigbee motors. Available in a white finish.

Timers:

- **Chronis RTS:** \$472.00 each.
Allows you to operate your motorized shades at any specific time of the day.
- **Sunis RTS (Sun Sensor):** \$516.00 each.
Allows your motorized shades to automatically rise and lower as the sun moves across the sky.

Plug-in Cords

Plug-in cords eliminate the need for an electrician when using remote control motors.

PLUG-IN CORDS (with molded 90° NEMA plug)				
Length of cord	3 feet	6 feet	12 feet	24 feet
Price	\$70	\$80	\$94	\$148

After Market Plug (attached to pigtail): \$35.00 each.

Transformer/Distribution Panels are used in situations in which you may have more than one Low Voltage Motor (ST30 or DC50). This can be a cost-saving device in many situations.

- **1-Motor Transformer with Plug:** \$116.00
- **5-Motor Panel:** \$1,922.00
- **10-Motor Panel:** \$2,892.00
- **15-Motor Panel:** \$3,746.00
- **20-Motor Panel:** \$4,536.00
- **Power Panel (for SDN):** \$3,400.00

SOMFY'S ADDITIONAL MOTORIZATION OPTIONS (continued)

Motor Tester

Used to test a motorized system without the aid of an electrician. Highly recommended for every installer.

- \$230.00 each.

Wire Free Li-ion Plug-in Charger

Comes with a 6-foot cable. Plugs into household outlet to restore the battery energy. A single recharger can be used to charge multiple motors.

- \$46.00 each.

FABRITEC'S ADDITIONAL MOTORIZATION OPTIONS

Bracket and Coupler

Under certain conditions, one motor can lift more than one shade. To do so requires a bracket and coupler (3 shades maximum).

- Add \$192.00 for one bracket and coupler for 2 shades operated on one motor.
- Add \$384.00 for two brackets and couplers for 3 shades operated on one motor.

HELPFUL HINTS

REVERSE ROLL: A reverse roll means the shade material will roll off the front of the shade roller rather than the back as shown in the illustrations to your right. A reverse roll can be useful if your shade material is one color on the front and a different color on the back, as is sometimes the case with blackout fabrics. A reverse roll shade will project away from the window more than a regular roll shade.

VERY LARGE AND VERY WIDE WINDOWS: These types of windows are a challenge! However, almost nothing is too large or too wide. Call our Sales Services Department for guidance.

DYE LOTS: Please order all shades for the same room at the same time to prevent dye lot variations. No two rolls of material will match 100%.

INSIDE MOUNT LIGHT GAP: Any roll shade mounted inside a window will have a light gap on the sides. If the fabric is a solar-screen fabric, this is not too significant. However, if it is a blackout fabric, it can be quite noticeable. Different lifting systems cause different light gaps. Call our Sales Services Department for specifics.

SELECTING SOLAR SHADE COLORS: When using a solar fabric, be aware that color affects glare and visibility. Darker fabrics reduce glare more effectively, and provide greater visibility than light fabrics. Very light fabrics can create significant, even objectionable glare if there are many shades in the same room.

OPENNESS FACTOR: Openness factor is a measurement of the amount of light that can penetrate a given fabric. In general, if you want sun protection from a south or west-facing shade, you should select an openness factor of 5% or less. For east and north-facing shades, openness above 5% will generally work. The angle of the sun when it hits your window also affects the amount of sunlight that can actually penetrate a sun-screen fabric. The closer to 90 degrees, the more light will penetrate; the sharper the angle, the less light will penetrate.

LAYERING SHADES: Solar-screen shades generally provide privacy during the day. However, after dark the reverse is true. For night time privacy and daytime view, consider using a two-shade system. See illustration to your right. Call our Sales Services Department for details.
