GENERAL PRICING INFORMATION

The **SUNSTAR price charts** in this price list are for **manually operated** *Folding* shades. Prices **include a Cord and Cleat**. However, other lifting systems can be specified at no additional charge, including a Cord and Cord Lock. The shade will be finished with a round bottom hem bar to provide added stability and weight. Other lifting options are available, including Continuous Chain Operators (CCOs) and Motorization. Please refer to the desired option for the appropriate surcharge.

LIFTING SYSTEMS

In addition to our standard cord and cleat system, we offer Continuous Chain Lifting Systems and Motorization. These systems require deeper headrails. See charts on pages 5, 8 and 9 for guidance.

Continuous Chain Lifting Systems

A Continuous Chain Operator, or CCO, is a hand-operated mechanism with a continuous chain loop for lifting and lowering a shade. CCO's come in white or black, and the operating chains come in a variety of colors, which we will coordinate with your fabric selection.

- Add \$162.00 per shade.

Slide Winder

Slide Winder is a gear driven continuous chain system that is much easier to operate than a standard CCO. Exclusively from Fabritec, this device keeps a shade level at all times.

- Add \$182.00.

Cords Forward

For convenience, particularly for inside mount shades, it is sometimes desirable to route the operating cords through the face fabric so they can be more easily reached.

- Add \$22.00 per foot of shade width to shade price.
- Minimum charge \$66.00.

Braided Cords

- No additional charge.
- Available upon request.

SPECIALIZED LIFTING SYSTEMS

Top Down-Bottom Up Shade

Shade stack can be moved to either the top or the bottom when the shade is open.

This feature can be added including motorization. See our Specification Sheets for further details.

- Add \$78.00 per foot of shade width to shade price.
- Minimum charge \$234.00.

Top-Down Shade

Shade stack will be at the bottom when the shade is open. This feature can be added including motorization. See our Specification Sheets for further details.

- Add \$36.00 per foot of shade width to shade price.
- Minimum charge \$108.00.

Cordless/Safer Shade

This shade does not require a pull cord to lift the shade. Simply tug on the bottom ring and the shade will rise to whatever level you choose. Minimum width is 18". Most shades can be fabricated to 84" wide by 84" high.

- \$220.00 per shade.

OTHER OPTIONS

Slanted Top Windows

Price a slanted-top shade as you would a regular shade using the highest side for the height measurement.

- Add \$22.00 per foot of shade width (6 feet minimum).
- Minimum charge \$132.00.

Curved or Arch Top Windows (require a template*)

- Add \$85.00 per foot of shade width.
- Minimum charge \$255.00.

Bay Windows (require a template*)

- No charge, unless you wish to miter the headrails at the joints.

Mitering

Templates* are required for any miter that does not form a 90° (degree) angle.

- Add \$60.00 per miter.

* For instruction on how to make a template, call our Sales Services Department at 800.828.2500.

Upended Headrail

Certain applications require a close fitting headrail to minimize the projection of the shade. French doors are a good example. In these situations, we turn our smallest headrail (1½" x ¾") on end, which keeps the shade as close to the door as possible. This option is only available with a cord and cleat lifting system.

- No charge.

Multiple Shades on One Headrail (for Cord & Cleat Systems)

For situations where two, three or more windows are grouped in a single opening, all the shades can be mounted on one headrail. There will be a ¼" gap between each shade.

- Add \$62.00 per individual shade.

Note: The cords for all the shades can be routed to one end of the headrail. This option is called REMOTE CORDS, and is available upon request for no additional charge.

Unicoupler - For shades that are at an angle to each other, e.g. in a bay window. Limited to 3 shades connected by two Unicouplers, operated by a single lifting mechanism.

- \$150.00 per coupler.

Flat Valance

- See Rollstar for pricing.

Covered Cornice

- See Rollstar for pricing.

Wrapped Hem Bars

- \$14.00 per foot.

(See information cards in front of your sample book or Sunstar brochure for details.)

MOTORIZATION

NO NEED TO WORRY!

We will help you choose from a wide selection of motorization and control options.

BATTERY POWERED MOTORS are easy to install and easy to operate. No electrician required. Battery motors are low voltage. These motors can be controlled by Remote Controllers, Wall Switches, Smart Phones or Tablet Apps. Selected motors are home automation compatible. Battery motors have a wide range of lifting capacities. Interior applications only.

24V DC QUIET MOTORS are low voltage motors that come with a transformer and are plugged into an outlet or hardwired directly into a low voltage panel. These motors are available with a variety of control options including Remote Controls, Wall Switches, RS485 Network/Home Automation, Smart Phones or Tablet Apps. They have have a lifting capacity of 17 to 35 lbs and are capable of operating medium to very large shades. Interior applications only.

120V HARDWIRED QUIET & ULTRA QUIET MOTORS can be plugged into an outlet or hardwired directly into the home/building's electrical system. These motor systems are most widely used because of their versatility. They can be operated by a variety of control options including Remote Controls, Wall Switches, RS 232/485 Network/Home Automation, Smart Phones or Tablet Apps. These are very powerful motors that can lift any size shade. Interior and Exterior applications.

HOME AUTOMATION MOTORIZATION: Our motors (or any motor you specify) can be controlled by any Home Automation System by using an appropriate Interface. For help with Home Automation or any motorization questions, contact our experienced Technical Support Department at 800.828.2500.

All shade motors and controls are completely assembled and pre-programmed at our factory.

CHILD SAFETY AND SAFER SHADES™

Because we care about the well-being of children, we are committed to offering window covering products that make our shades safer. For that reason, we have designed Safer Shades with features that meet or exceed the Window Covering Manufacturer Association's (WCMA/ANSI) recommendation. **When selling shades in a home with small children, alert your customer to the availability of Sunstar™ Safer Shades from Fabritec.**

SAFER SHADE FEATURES

- Sunstar Shades have lift cords on the back for raising and lowering the shades. To eliminate danger to small children, all Safer Shades are constructed with special Loop-Control Cords on the back, which limits the distance between pleats in a way that prevents small children from creating a loop large enough to put their head through.
- Our standard pull cords are knotted every 6 inches. This spacing is close enough to prevent danger to children. We can also braid the cords at your request. However, knotted cords are a little easier to grab and pull. Both methods are acceptable with Safer Shades.
- The pleat spacing on these styles must be adjusted to meet the Safer Shade standards. Refer to the chart below to see the pleat spacing.
- We have developed a variety of the Safer Shade lifting options. Below, we have detailed features of each of these lifting systems to help in deciding the best option for a specific situation.

MANUALLY OPERATED SAFER FOLDING SHADES

Cordless Lifting System: This Safer Shade does not require a pull cord to lift the shade. Gently tug on the pull ring and the shade will rise to whatever level you choose. The advantage of this shade is that there is never any dangling cord to worry about. The maximum size of the shade you can lift with this system is approximately 84" wide x 84" high.

Continuous Chain Operator (CCO) Lifting System: The Continuous Chain Operator (CCO) Lifting System is also available with a Safer Shade. The advantage of this system in a Safer Shade is that there are never any dangling cords. In addition, all CCO's come with a special, easy-to-install chain guard to prevent children from harming themselves with the chain loop.

MOTORIZED SAFER FOLDING SHADES

The ultimate in safety and convenience! With no dangling cords or chain loops, this lifting system insures that children will not get tangled up! To raise or lower a shade requires only the push of a button.

Motorized operating systems are available in a variety of configurations and price points to address a broad range of applications including Home Automation Systems.

Cord & Cleat (C&C) Lifting System (*with or without Cord*

Lock): These shades require a pull cord to lift a shade and a cleat to secure the shade in whatever position you want when raised.

They can also be made with a Cord Lock which can lock the shade into whatever position you require.

However, **all Safer Shade versions of these lifting systems require a cleat to wrap the excess cord around** to keep it out of reach of small children.

Dangling cords are a serious danger to small, unsuspecting children, and for their safety, all cords must be wrapped around the cleat which we provide.

SUNSTAR SAFER SHADES PLEAT GUIDE

The **pleat spacing** on a Sunstar Shade must be adjusted to meet the SAFER SHADE standards.

SHADE STYLE	PLEAT SPACING

WHO IS RESPONSIBLE FOR SAFETY?

Remind your customers that regardless of the lengths the window covering industry has gone to in making shades safer for small children to be around, the primary responsibility for protecting children from danger lies with the parent. That responsibility includes making certain that **any corded window covering product that does not meet safety standards, and even those that do, be kept out of reach of children.**
