OVERVIEW

Cablestar-EX™ shades are designed and engineered for outdoor use. A highly versatile folding shade system used to cover horizontal and sloped areas. The fabric folds like a Roman Shade when retracted. The cords retract the shade causing the shade to fold onto itself as the shade closes. Horizontal lifting cords run from the bottom of the shade through a series of pulleys and cord guides.

Motorized controls ensure smooth, convenient operation. A wide selection of fabric choices offer color, texture, view and performance.

Exterior solar shades are even more effective at reducing ultraviolet radiation than indoor shades. They reduce heat and glare, fading of furniture and carpet, and in general greatly reduce all the damage, discomfort, and annoyance caused by the sun.

Fabrics suited for outdoor use in our Cablestar-EX™ systems are listed in chart below.
